

The carrier who is invited to the group of Trusted Carriers by manufacturing and/or forwarding companies using the Private Exchange system gains access to all their loads in one location.

Every carrier can start cooperation with many companies and build their own network of contacts.

**SIGN UP** 

## This pays off:

first-hand loads directly from trusted manufacturing and forwarding companies

relevant filters for email notifications

to the customer's load

- all loads from trusted contractors in one location wider choice enabling you to plan your work ahead. You decide on the most profitable loads
- access to loads that are not traded on public exchanges igorphiloads are sold to Trusted Carriers in the first place
- shorter time of waiting for the payment faster circulation of documents you can include transportation documents (e.g. CMR, packing list or VAT invoice) in the load in
  - Infracht. You may do it using a phone or a tablet. Faster circulation of documents allows you to issue an invoice sooner, shortening the time of waiting for the customer's payment loads matching your fleet and routes

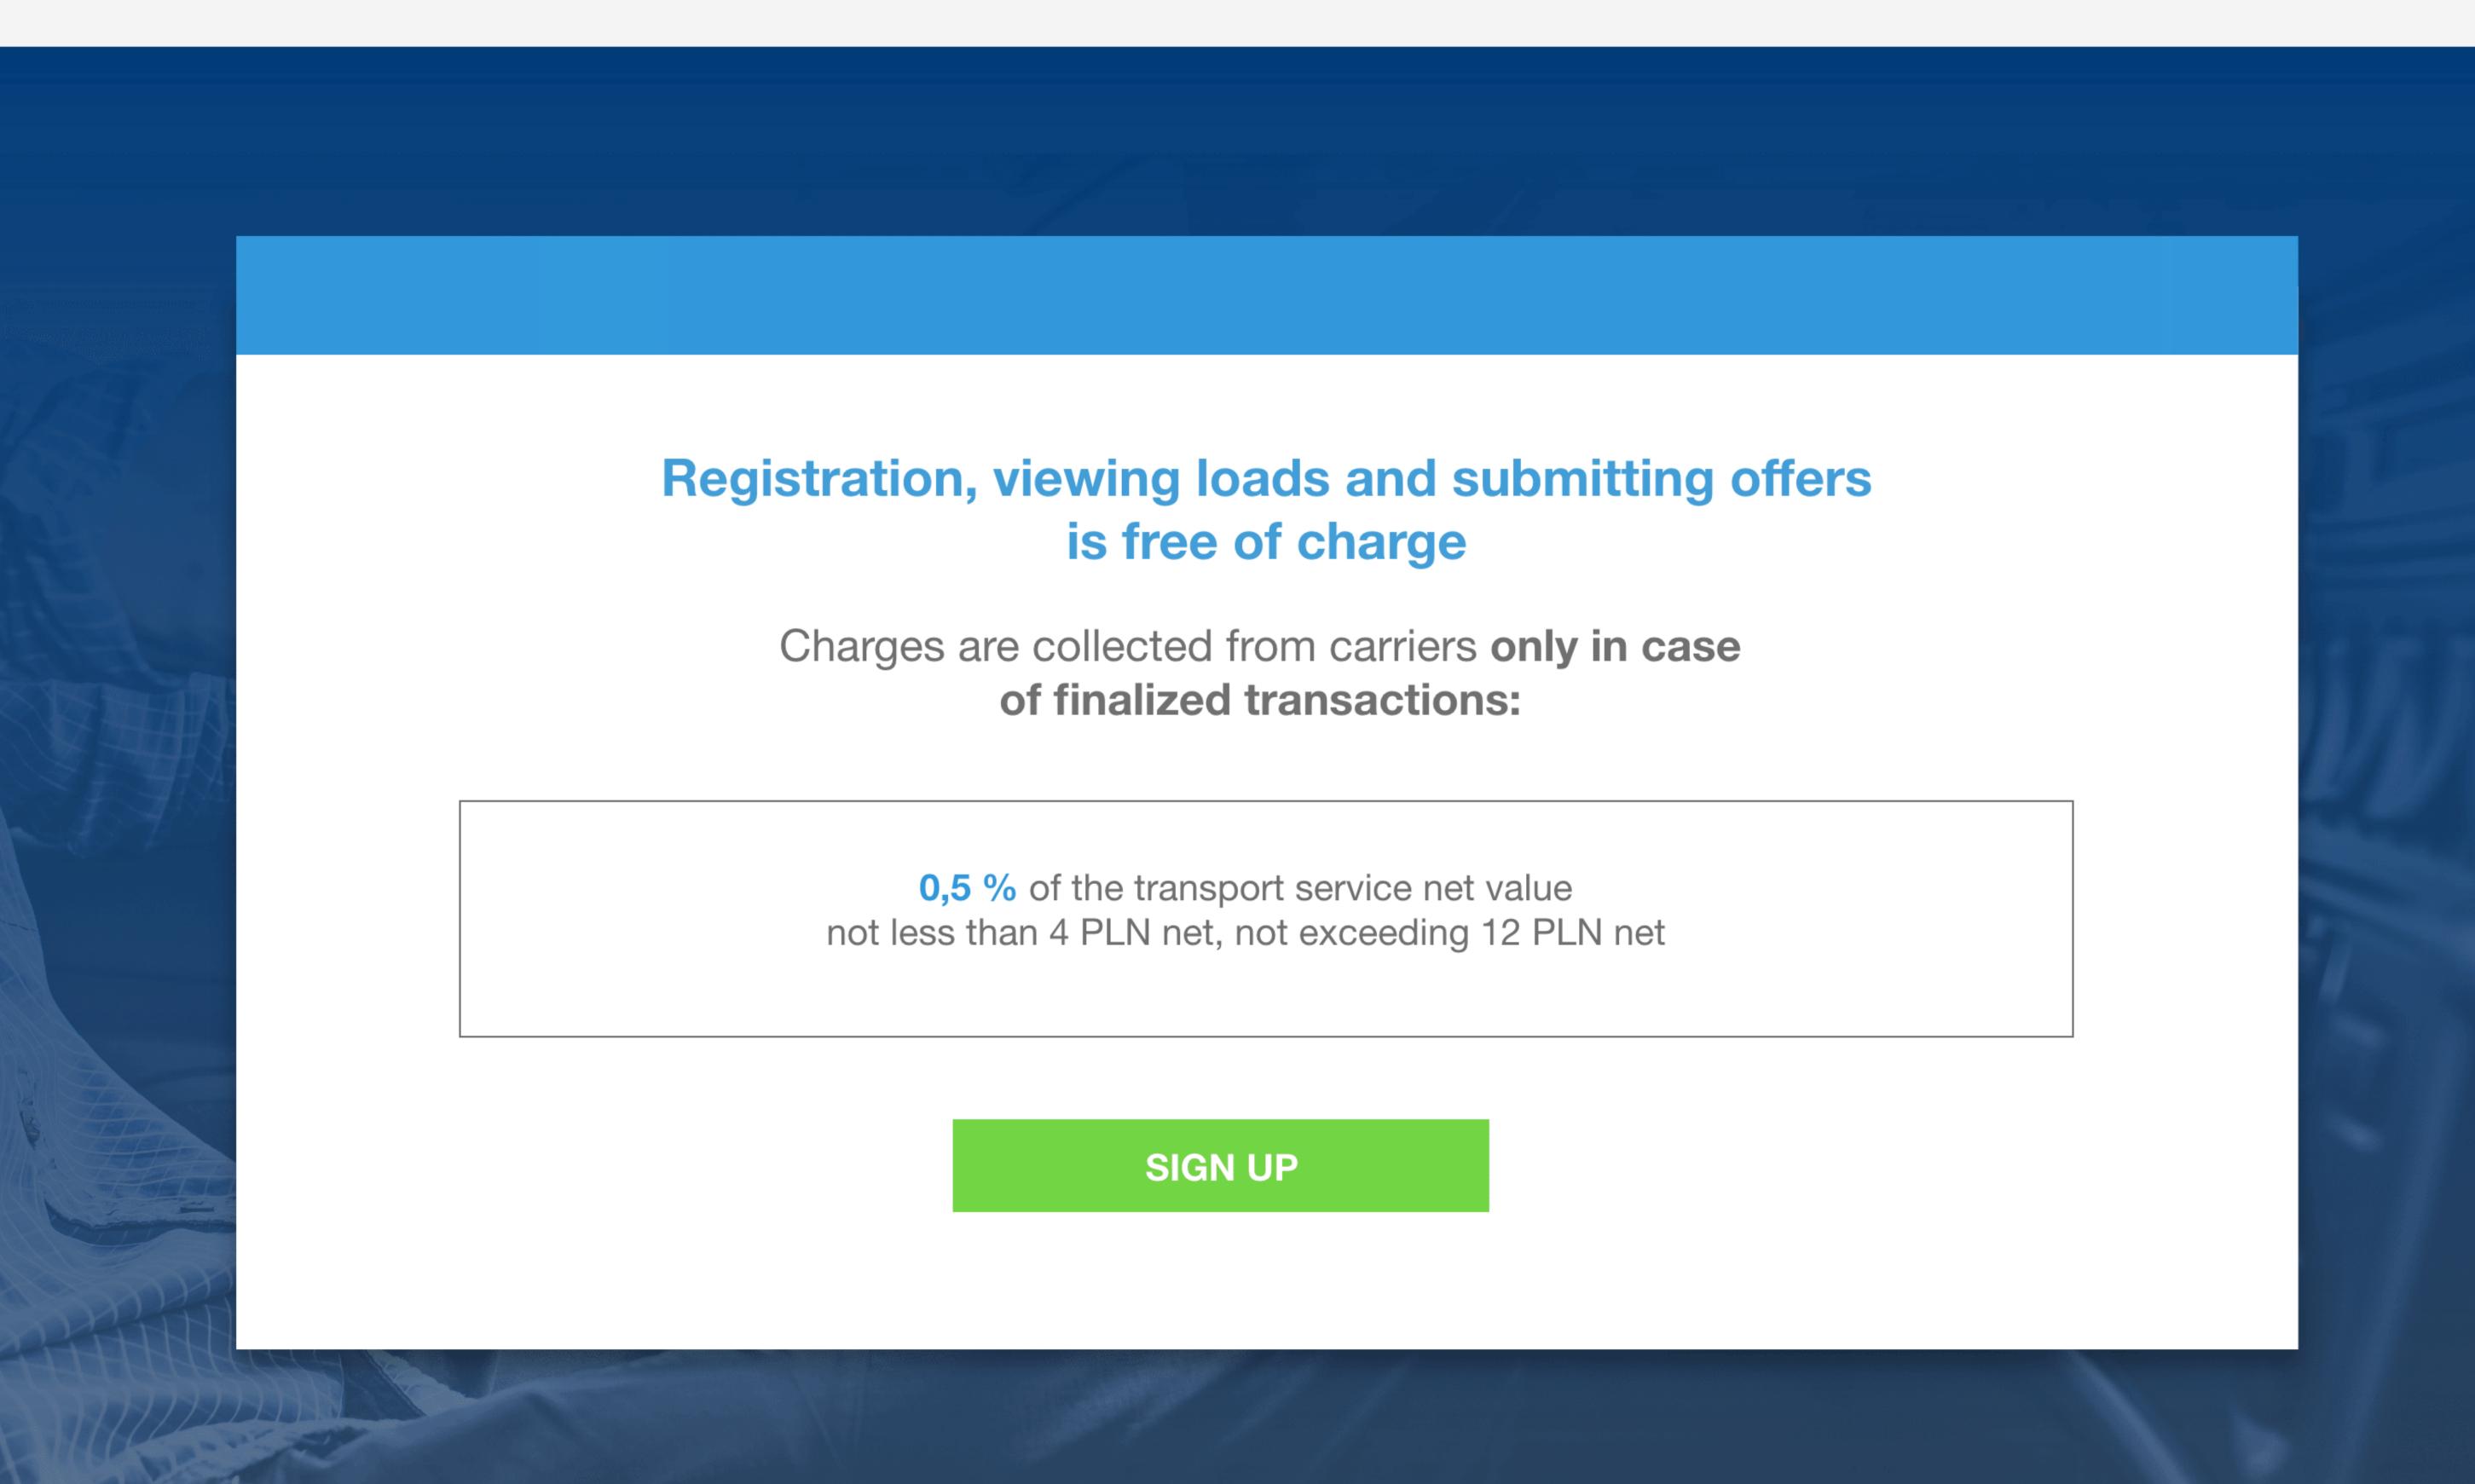

you can decide what loads you wish to be informed about - the system allows you to set up

- opportunity to fill out the driver's details and registration numbers on your own you can add and update the information in the system without the need to contact the forwarder by phone or by email
- confirmation of loading and unloading in the system no need to call the forwarder to inform them of the vehicle loading or unloading, you don't even have to remember about it, at the right time, the system will request you to enter the data in Infracht
- opportunity to build networks of new contacts and continuous relations with customers Internet access is enough to submit offers as a response
- wherever you are, information on loads is delivered via email or the Internet browser free access to Infracht General Exchange you also gain free access to loads of other customers with whom you haven't cooperated yet

The whole process, from winning a load to sending documents, can take place via the platform
